PROFILE

Hello! I'm a seasoned QA Engineer with more than 7 exciting years under my belt. My playground? Manual and Automated testing for Web-based and Client-Server apps, especially in the world of Insurance. I love diving into details and have a knack for keeping quality top-notch. But that's not all - I'm also a passionate lecturer. I get a kick out of sharing my insights on QA and QA automation with others, always with an eye on pushing the industry forward. Complex testing scenarios? Bring them on! I'm also a whizz at keeping projects on track and keeping up with the latest and greatest QA trends.

WORK EXPERIENCE

Senior Lead QA Automation Engineer

Inforce - PURE (Web application - Insurance) - USA   Dec 2020 - Present

- Pioneered a robust test automation framework for functional and non-functional testing.
- Constructed comprehensive test suites for early issue detection and system integrity.
- Enriched the framework to incorporate performance testing.
- Implemented pipelines for automated test executions minimizing manual intervention.
- Contributed to multiple aspects of application testing, ensuring exhaustive coverage.
- Led KT sessions and disseminated expert knowledge among team members.
- Onboarded new team members, accelerating their transition and effectiveness.
- Organized and managed additional QA automation resources.

Senior QA Automation Engineer

Thinksurance (Web/Mobile application - Insurance) - DE   Apr 2021 - Apr 2023 (2y contract)

- Engineered new tests, enhancing end-to-end (E2E) testing coverage and efficiency.
- Planned and coordinated all testing activities.
- Executed both manual and automated tests, ensuring system stability.
- Conducted UI and API testing, validating the user experience and the system's backend.
- Built a custom framework for API testing, improving the effectiveness of backend testing.

Cypress | TypeScript | Supertest | Postman | Swagger | Mochawesome | GitLab | JIRA | SCRUM

Senior QA Automation Engineer

IOHK (Desktop application - Blockchain) EU   Jan 2021 - Jun 2021 (6m contract)

- Contributed to the testing of the Mantis Wallet, a key component in an Ethereum Classic blockchain project, ensuring its performance and security.
- Automating tests to enhance speed and reliability.
- Authored functional tests using Cucumber, ensuring the software met specified requirements and provided a smooth user experience.

WORK EXPERIENCE

QA Lecturer

Online education - SR   Jan 2020 - Present

- Orchestrated and conducted comprehensive courses covering both manual and automated QA testing, enhancing the skill sets of numerous individuals.
- Demonstrated hands-on teaching in various languages including Java, JavaScript, TypeScript, C# and Python, broadening the students' coding capabilities.
- Utilized industry-standard tools and frameworks such as Selenium, Cypress, Appium, RestAssured, Postman, SoapUI, and JMeter in lectures, providing students with practical and relevant knowledge.
- Engaged students in interactive learning experiences, fostering a conducive environment for understanding complex testing methodologies and practices.

WIX | WordPress | Zoom | Slack | Canva | ChatGPT | Udemy | OBS

Intermediate QA Automation Engineer

Betagy - BetKing (Web application - Betting, Gaming) NG   Oct 2019 - Nov 2020

- Performed manual and automated API testing as part of the platform team, utilizing Supertest and Node.js, ensuring robust backend functionality.
- Conducted comprehensive testing on betting procedures, as well as user login and registration features, validating user experience and system integrity.
- Worked on a lottery project, employing JMeter for performance testing, ensuring the application's ability to handle high loads and respond efficiently.

JavaScript | Supertest | Postman | Fidler | Azure DevOps | JIRA | SCRUM

QA Automation Engineer

AssertQA(Web application - Finance) - DE   Jul 2018 - Oct 2019

- Creating automated test cases from the user stories or from test scenarios
- Executing the automated test cases
- If defect found, reporting it
- Performing the tasks again where the defect was found
- Making sure that the application is defect free
- Sending the test reports to test lead.

Java | Selenium | JIRA | XRay | SCRUM

QA Engineer

AssertQA (Web application - Finance) DE   Jan 2018 - Jul 2018

- Creating test cases from the user stories or from test scenarios
- Executing the test cases
- If defect found, reporting it
- Performing the tasks again where the defect was found
- Making sure that the application is defect free
- Sending the test reports to test lead.

JIRA | Xray | SCRUM

Java Developer / QA Tester

Quest Gaming(Desktop application - Gamming) SRB   Jan 2017 - Jan 2018

- Working with business on requirements
- Developing desktop application for online ordering
- Performing testing tasks
- Build and managed 2 websites
- Overseeing, creating and editing content of web sites
